**DETAILED ACTION**

***Response to Amendment***

The cancellation of claims 1-4 and the addition of claims 5-16 filed in the response on 2/7/05 is acknowledged. The Restriction requirement set forth below is in response to applicant's amendment.

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 5-16, drawn to a method of coating, classified in class 427, subclass 2.12+.

II. Claims 17-19, drawn to a polymer solution, classified in class 526, subclass 303.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the NIPAM polymer solution

can be use in contact with a variety of substrates derived from various organic and inorganic materials.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
